- Debian Med commits
- #debian-med at irc.debian.org
- Mentoring of Month (MoM)

5 / 8

Needed packages

dpkg-dev needed tools
make *debian/rules* is a *Makefile*
dh-make create a template
debhelper just use it
devscripts very useful
fakeroot pretend to be root
gnupg sign package
lintian policy checker
pbuilder build package in chroot
build-essential metapackage

6 / 8

What is your most wanted project

?

7 / 8

How to start?

```
dh_make  
or  
svn://svn.debian.org/svn/debian-med/  
trunk/package_template
```
