Forgot lunch over hacking

Pregnant
with
computer

Engaging with Debian

- Seeking for a Linux distribution
- Computer with very low capacity - `/usr` mounted via NFS
- Susan G. Kleinmann has build three times a kernel just for me
- I decided that must be my distribution

Marrying Debian

- How did I decide to contribute?
- As usual something is missing and you want to fix this
- Package wordnet needed a new maintainer
- Packaging training with xteddy
- Later I started packaging what my colleagues might need

account can be found encrypted with your PGP key and appended to this message.

...

Honeymoon was 2 years later at DebConf 0

- Met first Debian Developer Sven Luther in Strasbourg when I was on *holidays* with my wife
- No more meetings with other Debian Developer before DebConf 0 in Bordeaux.
- Countless others later on several other events

Please applause for my sensitive wife

for beeing very patient and never blaming me about the other love in my life.

Debian is really family

- ... and families are mourning losses
- First Debian Developer who died was Joel 'Espy' Klecker
- Died at 11. July 2000 in the age of 21 due to Duchenne muscular dystrophy
- Debian was literally his life
- Made me aware the level of connection with fellow DDs

Cape Town was the most favourite DebConf of my wife

How? - duck

- run duck in package source tree
- "Error level":
 - O, I, E, different certainty levels
- Current features:
 - reports "non-200 OK" for HTTP/(S)
 - Reports domain redirection, parked domains, HTTP → HTTPS redirection
 - HTTPS → HTTP (!) redirection
 - Reports broken URLs

Debian Potential Grandfathers project

To: Debian Project <debian-project@lists.debian.org>

Date: Tue, 1 Apr 2008 08:59:10 +0200 (CEST)

- "Potential Grandfather": somebody who had a child that *could* have a child
- Joke born on some DebConf - possibly after cheese & wine party
- Robert Hilliard <hilliard@debian.org>:
I am 81 years old, and have one grandchild.
I find your post highly offensive.
- Holger pointed out not to exclude grandmothers

Another loss in Debian

Debian Project mourns the loss of Clytie Siddall

February 4th, 2015

The Debian Project sadly announces that it has lost a member of its community. Clytie Siddall passed recently after a long battle with Myalgic Encephalomyelitis/Chronic Fatigue Syndrome.

Clytie was a contributor of Vietnamese translations to Debian and other projects for many years. Within Debian she worked on translations for the installer, dpkg, apt and various documentation.

Sometimes some loss bears something new

- When reading the announcement I was remembering the kind lady from our twin city Hội An
- Just asked her for a translation
- Four hours later:

Hi Andreas,

I am sorry for this sad story...

Please find the attachment for the Vietnamese translation.

And, I'm happy that I can help you something

Good night! Minh

Dự án Debian tiếc thương trước sự ra đi của cô Clytie Siddall

...

- Afterwards Minh wanted to know more about the project

Minh decides to go to DebConf 15 in Heidelberg

...

I have joined Debian Community as a Vietnamese translator for just two months thanks to my friend-Andreas Tille who brang me to Debian. As you see, Im very new here. And I only did the translations about a sad news of "The loss of Clytie Siddall" and

...

I have also sent the translation of "Jessie coming soon"

...

Regarding your request of gpg key id, is it fine without that ID? To be honest, I actually have no idea about it since I do not have any IT background.

...

Warm regards, Minh.

Minh was able to come to DebConf 15 due to

- DebConf visa team
- DebConf bursary team
- Government of my hometown Wernigerode
- Hương
- Minh's endurance
- My spare time due to recovering from meniscus surgery

Finally Minh arrived in Heidelberg

In that session Minh impressed me the most

I'm known as the man with the photos

I love Debian

... since it not only simplifies my work on the computer but since it enriched my life.
