

A robot head with glowing blue eyes is pouring a burrito filled with salsa into a bowl. The background is a cityscape with a tall tower.

salsa.debian.org

Who am I?

a bit of history

how does it work

Where can you help?

HIBISCUS 8.50
PALOMAS 7.50

QUESADILLA CLASSICA =
KÄSE + KÄSE + KÄSE + KÄSE
KÄSE 3.50

A few bits of history

- salsa is the successor of alioth.debian.org (a gforge/fusionforge site) which existed from 2003 to 2018
- We started building salsa in 2016 which was not free of discussions¹
- salsa left beta beginning of 2018 ²

¹We even did a poll ²salsa leaving beta

Architecture Overview

The team

- ganneff

and please welcome

- zigo
- terceiro

Challenges

- improve overall performance
- optimize runner setup (setup a second runner, ...)

Vision

Create a PPA like service

Things that would help

- a team and hardware for the ppa idea
- better - dedicated - hardware
