D E B C O N F I E K E Y S I G N I N G

List of Participants (v 1.0)

Here's what you have to do with this file:

1. Print this file to paper.
2. Compute this file's SHA256 checksum: sha256sum ksp-dc16.txt
3. Fill in the hash values on the printout.
4. Bring the printout, a pen, and proof of identity to the keysigning.

For each participant:

1. Compare the hash you computed with the other participant.
2. Ask if the other participant's gpg fingerprint on the hardcopy is correct.
3. Verify each other's identity by checking preferably a passport.
4. If you are satisfied with the identification, mark on your hardcopy that the other participant's gpg fingerprint is correct and has been identified.

SHA256 Checksum: ----- []
