Debian

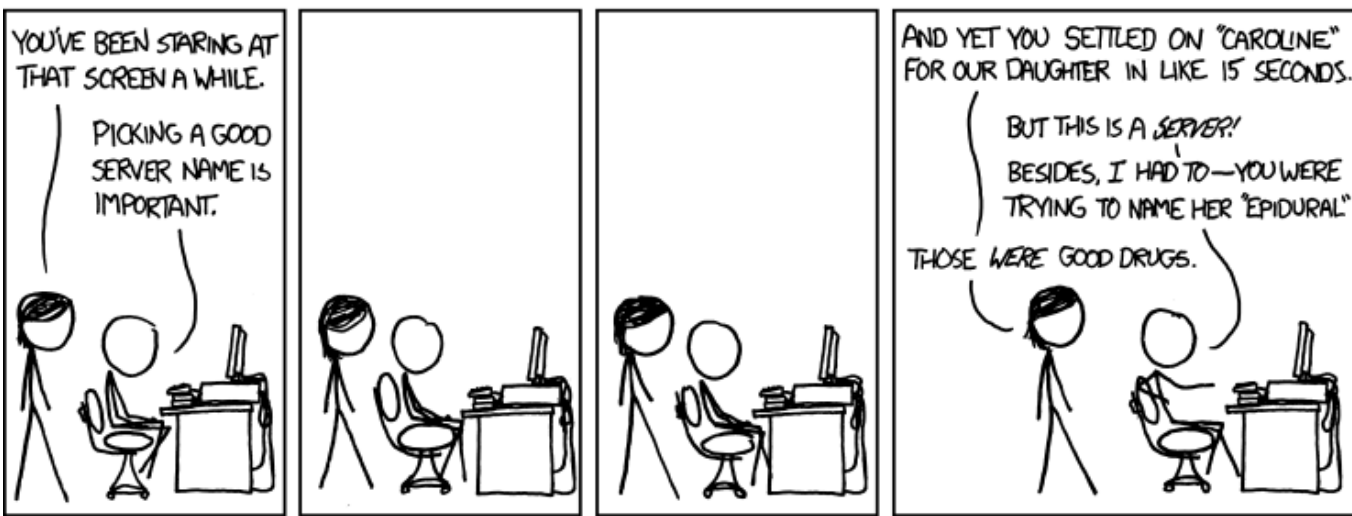

Une distribution, un projet, des contributeurs

Quelques dates

- Fondée par Ian Murdock (16 août 1993)
- Debian 1.1 Buzz (17 juin 1996)
- Principes du logiciel libre selon Debian (DFSG) (5 juillet 1997)
- Première DebConf à Bordeaux (5 juillet 2000)

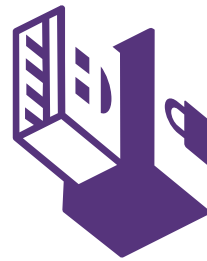

This hostname is going in dozens of remote config files. Changing a kid's name is comparatively easy!

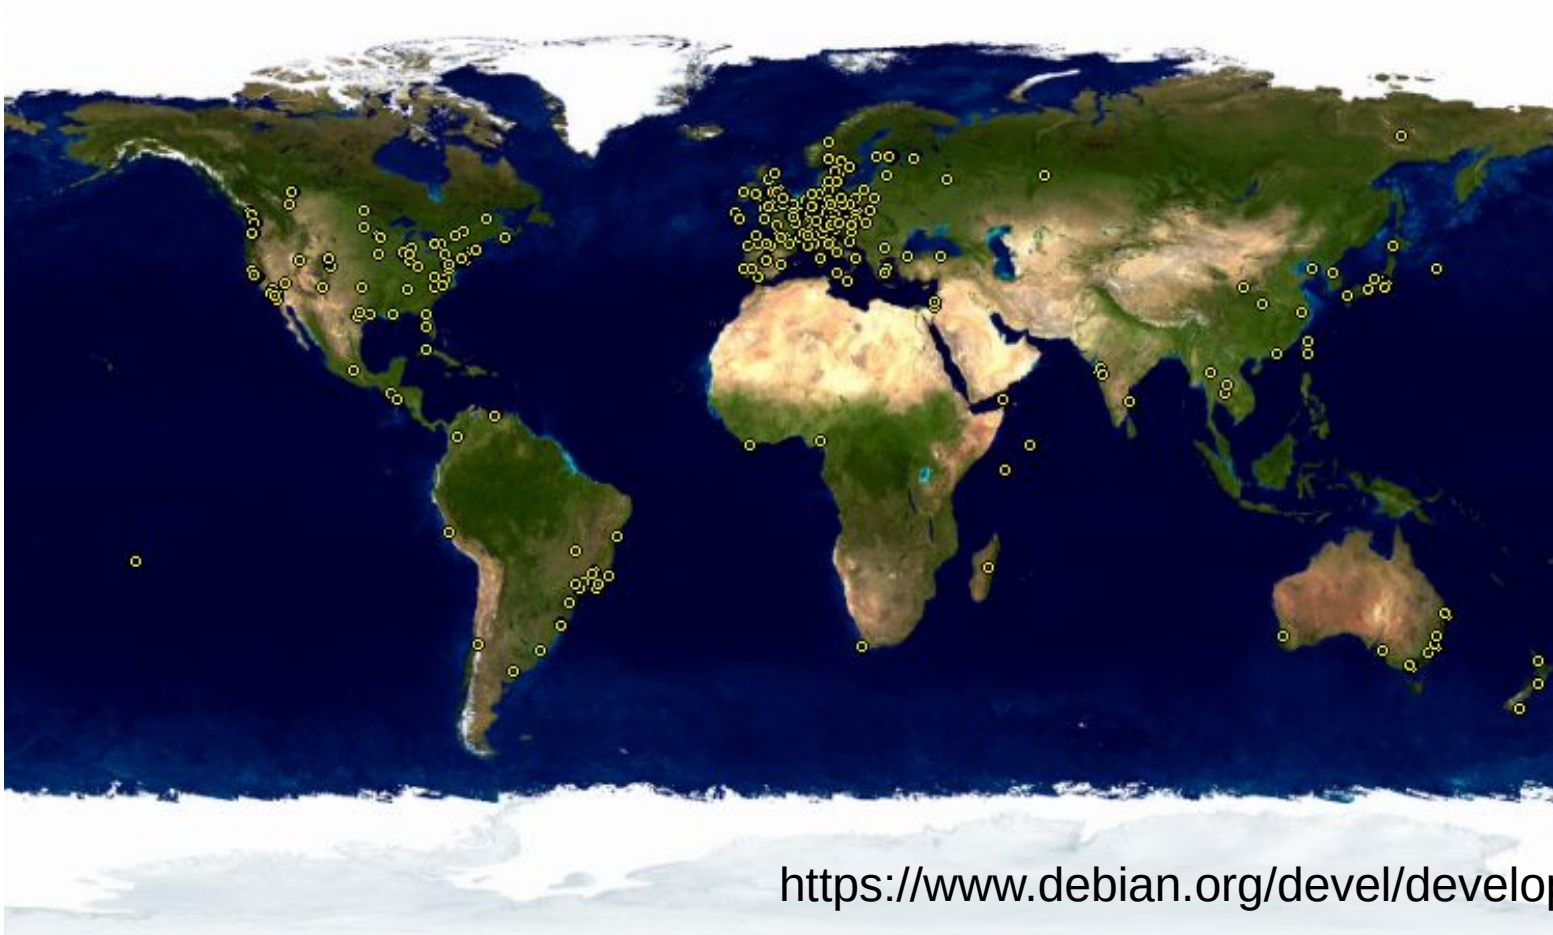

<https://xkcd.com/910/>

Quelques chiffres

- Plus de 50 000 paquets binaires
- Installateur disponible en 75 langues
- 10 architectures (amd64, i386, armel, armhf...)
- Des centaines de distributions dérivées (Tails, Ubuntu, etc.)
- Des milliers de contributeurs

Répartition des développeurs

<https://www.debian.org/devel/developers.loc>

Distributions majeures et dérivées

- Une poignées de distributions Linux à la base :
Debian, Red Hat Enterprise Linux, Slackware,
Gentoo, Arch Linux, Android, etc.
- De nombreuses distributions sont dérivées des
précédentes :
Tails, Ubuntu ou Raspbian par exemple pour Debian

Différents types de contributions

- Maintenance de paquets
- Maintenance de services
- Retour d'expérience, rapport de bogues
- Aide aux utilisateurs
- Traduction de descriptions
- Conception graphique
- Organisation d'évènements

Mise à jour de l'apparence du site

- Treize ans sans grande modification de mise en page
- Kalle Söderman propose activement de faire évoluer le style du site
- Adhésion à la nouvelle charte graphique à partir du 6 février 2011 (sortie de Squeeze)

What is Debian?

Debian is a [free](#) operating system (OS) for your computer. An operating system is the set of basic programs and utilities that make your computer run. Debian uses the [Linux](#) kernel (the core of an operating system), but most of the basic OS tools come from the [GNU project](#); hence the name GNU/Linux.

Debian GNU/Linux provides more than a pure OS: it comes with over 25000 [packages](#), precompiled software bundled up in a nice format for easy installation on your machine.

[Read more...](#)

Getting Started

The [latest stable release of Debian](#) is 5.0. The last update to this release is 5.0.7 and was made on November 27th, 2010. Read more about [available versions of Debian](#).

If you'd like to start using Debian, you can easily [obtain a copy](#), and then follow the [installation instructions](#) to install it.

If you're upgrading to the latest stable release from a previous version, please read [the release notes](#) before proceeding.

To get help in using or setting up Debian, see our [documentation](#) and [support](#) pages.

Users that speak languages other than English should check the [international](#) section.

People who use systems other than Intel x86 should check the [ports](#) section.

Re: [RFR] po://{blends.doc}.fr.po

Bonjour,

Dixit jean-pierre giraud, le 09/03/2018 :

>Le premier n'est que très peu modifié. Le second a été largement
>remanié, mais il n'y a que qu'un paragraphe nouveau : lignes 265-283

Suggestion après relecture de ce seul paragraphe.

Baptiste

Fichier Éditer Vue Aide

debian/1.6.3-1 master remotes/origin/master Update changelog for 1.6.3-1 release

- Update Standards-Version to 4.1.3
- Move project repository to salsa.d.o
- patch-queue/master Pick up copyright instead of LICENSE
- Mimic distribution path for tests and help2man
- Adapt res/ path
- Use homade autoloader for CLI
- Update upstream source from tag 'upstream/1.6.3'
- upstream/1.6.3 upstream remotes/origin/upstream New upstream version 1.6.3
- 1.6.3 Release 1.6.3
- Doc tweak
- Update changelog
- Fix warning for packages not existing while they exist but not at the required stability, fixes #7044
- Update SPDX licenses to 1.3.0, fixes #7039
- Fix self-update regression, fixes #7045
- Add some more debugging info
- Fix github authentication request, fixes #5767
- make sure "svn info" output is parsed in a x-platform way
- Pass auth credentials to svn log while retrieving commit logs
- Move self-update "SPDX" from debian/patches to upstream

Id SHA1 : fb2c0016b1f29eb4a899cbe2d442032e1b28663d ← → Colonne 1 / 7992
