Thankful user

Date: Tue, 5 Jul 2005
From: Djoume SALVETTI <salvetti@crans.org>
To: Andreas Tille <tille@debian.org>
Subject: Re: cdd ACCEPTED

Oups! Sorry for the noise, I have misconfigured my debarchiver. :-/

(BTW, many thanks for cdd-dev, I foudn it very usefull! :-)

Djoume

Explanation

I dont really build a CDD. I'm working in a enginnering school (IFITEP) and I'm switching all PC (a hundred) from Redhat to Debian sarge.

Each courses require a set of software, so I'm building a meta-package for each courses (debian-ifitep-java, debian-ifitep-maths, etc..) and adjust the dependency according to the need of the teacher.

I will certainly have to adjust the dependency during the school year (for example if a teacher have forgotten to tell me something) and the best way I have found to keep the PC in sync is to :

- make the meta package as explained before
- make a local repository
- auto-upgrade the PC at boot time and with a cron

With the help of your CDD-HOWTO, I have found it very easy to build meta-package and I've also decided to make a "private" meta-package with a selection of packages I can't live without and use it when I made a new debian install.

Thankful user

- Fall-back if *debconf* not possible
- Give local admin helping hand
- Problems on upgrades might be solved by *cddtk*
 - Wrapper around apt
 - Store original config files
 - Move these in place before upgrades
 - Redo CDD specific configuration
