root@musang:/bin# _

#1: Linux? Tutta roba da terminale!

#2: Ubuntu è più
difficile di Windows

#3: Windows ha un
miglior supporto
per l'hardware

#4: Ubuntu è
solo per newbie

#5: Ubuntu è
solo per nerd

#6: Ubuntu non crasha mai!

#7: Gli aggiornamenti di Ubuntu
possono creare problemi

#8: Ubuntu ha
poche applicazioni

A photograph of a desktop computer setup. In the foreground, an orange tabby cat is lying down, its head resting on a white computer keyboard. The cat's eyes are closed, and it appears to be sleeping. Behind the cat, a large computer monitor is visible, displaying a solid orange background. To the left of the monitor, there is a black speaker with a silver circular grille. The overall scene is dimly lit, with the primary light source coming from the monitor.

#9: Installare applicazioni
su Ubuntu è difficile

#10: Solo un programmatore può contribuire ad Ubuntu

```
if ($data['type'] == "dropdown2")
$count = $data['number'];
$call = $data['contents'];
echo "<select name=\"", $data['name']
n";
foreach ($call as $c) {
echo "\t\t<option value=\"\"
if($value == $data['default']
echo "
selected";
}
echo ">", $call
```

**Bonus Myth: Debian
è migliore di Ubuntu!**
