A black and white photograph of Richard Stallman. He is a middle-aged man with long, dark, wavy hair and a full, grey beard. He is looking slightly to his right with a thoughtful expression. His right hand is raised to his forehead, with fingers spread. He is wearing a dark, collared shirt. The background is dark and out of focus.

Hello everybody out there using minix -

I'm doing a (free) operating system (just a hobby, won't be big and professional like gnu) for 386(486) AT clones. This has been brewing since april, and is starting to get ready. I'd like any feedback on things people like/dislike in minix, as my OS resembles it somewhat (same physical layout of the file-system (due to practical reasons) among other things).

I've currently ported bash(1.08) and gcc(1.40), and things seem to work. This implies that I'll get something practical within a few months, and I'd like to know what features most people would want. Any suggestions are welcome, but I won't promise I'll implement them :-)

Linus (torva...@kruuna.helsinki.fi)

PS. Yes - it's free of any minix code, and it has a multi-threaded fs. It is NOT protable (uses 386 task switching etc), and it probably never will support anything other than AT-harddisks, as that's all I have :-).

ENCICLOPEDIA

A close-up, over-the-shoulder view of an air traffic controller in a dark room. The controller, wearing a headset with a microphone, is looking at a large circular radar display. The display shows a complex network of yellow and green lines representing flight paths and radar returns. The controller's hand is visible, holding a small white cup. The radar console is filled with various buttons and controls, some labeled with technical terms like 'SWEEP ON/OFF', 'CURSOR DECENTERING', and 'INCREASE/DECREASE'.
